First of all we thank all those who over the years have actively contributed to shaping the novel software design and analysis method explained in this book. They are too numerous to be mentioned here. They all appear in some way or the other on the following pages, in particular in the bibliographical and historical Chap. 9 which can be read independently of the book. We then thank those who have helped with detailed critical comments on the draft chapters to shape the way our arguments are presented in this book: M. Boerger (Diron Münster), I. Craggs (IBM Hursley), G. DelCastillo (Siemens München), U. G. Esser (Simon Fraser University, Vancouver, Canada), J. Huggins (Kettering University, Michigan, USA), B. Koblinger (IBM Heidelberg), P.
