

A personal recount in areas of particle physics and related fields as a research physicist for over 50 years, Adrian Melissinos insights into the ways that general research was carried out, as well as the evolution of particle physics from 1958 to 2008 will prove valuable to science history enthusiasts, as well as particle physicists. Be it conventional accelerator experiments, the use of microwave techniques in search of cosmic axions, or taking advantage of high power lasers to observe light-by-light scattering, the excitement of searching for something new in the face of failures and then successes is enriching, and the collaboration with gifted and outstanding colleagues and students proves insightful. A hybrid of personal reminiscences and a professional journey, readers get to relive the joy and excitement of researching and teaching in small groups during those early years while gaining a partial historical perspective of particle physics since 1958 – all in Reminiscences: A Journey through Particle Physics. Interview with Professor Melissinos Contents: Level Crossing Strange Particles Deep Inelastic Scattering The Rising pp Total Cross Section Dimuons and Trimuons The Cornell B-Factory Fourteen Orders of Magnitude Axions Lasers Matter From Light Photoinjectors The Earth Tides Readership: Research physicists and students, as well as scientifically-inclined general public, such as readers of Scientific American.

The Next American Revolution: Sustainable Activism for the Twenty-First Century, Kaleidoscope of Short Stories Poems, Art, Prose, Sniper in Action: History, Equipment, Techniques, Divorce Law and Practice in Scotland, Lucretian Receptions: History, the Sublime, Knowledge, Niedersächsische Bauordnung (NBauO) vom 03. April 2012 (German Edition), Hard-to-Solve Math Puzzles, Anger Management Best Practice Handbook: Controlling Anger Before it Controls You, Anger Management Proven Techniques and Exercises, Egypt (Picture a Country), Select Orations of Cicero Chronologically Arranged; Covering the Period of His Public Life,

Editorial Reviews. About the Author. Professor Melissinos has been involved in experiments at four major U.S. particle accelerators. He was also involved in the .

A personal recount in areas of particle physics and related fields as a research of particle physics since – all in Reminiscences: A Journey through.
