

The 1990s were years of contradiction for British cinema. On the one hand, the exhibition and production of British films bounced back from the dark days of the early 1980s, in which cinema attendance and filmmaking slumped to an all-time low. On the other hand, foreign investment now played a major role in supporting the industry, with companies erecting cinema multiplexes and, particularly in the case of American investment, pouring money into big budget British productions. While this kept studios, technicians, directors, and actors busy, none of the profits from these films made it back to Britain. Through a detailed analysis of twenty films, *Studying British Cinema: 1990s* painstakingly reexamines this fragile revival of British film fortunes. Placing these and other films against a backdrop of vibrant cultural, technological, and political change, the volume illuminates a decade that would come to be known as Cool Britannia, evoking a deliberate comparison with the events of the 1960s.
